Citizens Initiative Against Mosquitoes

**Do's & Don'ts**

Suggestions to Prevent Breeding of Mosquitoes

Change water once weekly in flower vases and drain trays of potted plants.

Do not store water in open containers & cover all water containers with lids.

Prevent outdoor and indoor water stagnation in and around your residence & society especially in unused or broken pots, vessels, old tyres, empty coconut shells.

Scrub and clean margins of containers used for water.

Cover overhead tanks to prevent access to mosquitoes. Ensure regular cleaning of water tanks.

Store old drums or barrels inverted to prevent water accumulation.
