

AOEC's dedication lies in the enlightenment against the roots of the ignorance of the availability of Free Masters education with very high International standard and reputation.

In simple words, after the admission to one of the best universities in the world (in Sweden/Finland), your whole education cost or tuition fees are subsidized by their respective governments, which is a result of its democratic approach.

AOEC targets to take the highest advantage of this situation and wishes to help more and more Indian students, who unusually spend a wholesome amount just to attain their Masters from other countries.

We have a track record of our students who have been there (Sweden/Finland) and are currently into Harvard Medical School, U.S.A; University of Toronto, Canada, etc. for higher studies and thesis work.

If the institutes/universities like Harvard and Toronto recognizes their true value, why don't you ?

This consultancy intends to address the myths and mysteries of "Life after your Graduation".
